

Commercial Tanks Introduction

Chromagen produces commercial tanks designed to store hot water for commercial use. The inner enamel coating is applied by vacuum technology and produced with superior quality. The tanks insulations assure minimal heat losses from the ambient air.

Chromagen's produces commercial vertical water tanks with or without heat exchangers that may be installed in forced circulation systems. All tanks may be available with an electric back up.

Commercial Tanks Specifications

Forced Circulation Tanks – No Heat Exchanger

Tank Size	1,000	1,500	2,000
Weight (Kg)	302	350	480
D&H	2,062x1,010	2,250x1,120	2,500x1,260

Forced Circulation Tanks - Single Heat Exchanger

Tank Size	1,000	1,500	2,000
Weight (Kg)	340	460	550
D&H	2,062x1,006	2,250x1,116	2,500x1,272

Forced Circulation Tanks - Double Heat Exchanger

Tank Size	1,000	1,500	2,000
Weight (Kg)	360	450	570
D&H	2,065x1,010	2,247x1,116	2,500x1,272

- Due to on-going development, specifications are subject to change without notice.
- The above represents the average dimensions and weights of produced products.
- 3000 L, 4000 L and 5000 L tanks are available.
